## Memorandum

TO: Andrew Pinter, DWQ-Aquifer Protection Section (Mooresville Regional Office)

FROM: Teresa Bradford, DWM-Solid Waste Section 

SUBJECT: Fieldcrest Cannon Ash Handling Facility  
Located at the Kannapolis Wastewater Treatment Facility  
off of Pump Station Road and Glen Avenue, Kannapolis  
Rowan County

In an effort to survey coal combustion by-product structural fill sites, an inspection was conducted at the closed Fieldcrest Cannon Ash Handling Facility on December 21, 2009. After subsequent document research, the Solid Waste Section has determined that the site was inadvertently incorporated onto our structural fill list. By way of this memo, the Solid Waste Section is officially referring regulatory oversight of the coal combustion by-product fill located at the Fieldcrest Cannon Ash Handling Facility to the Division of Water Quality, Aquifer Protection Section.

If you have any questions or need any additional information regarding this matter, please contact me at extension 2160 or by e-mail at [teresa.bradford@ncdenr.gov](mailto:teresa.bradford@ncdenr.gov).
